University of Denver, Daniels College of Business

Visiting Assistant Professor of Accounting

Denver, CO

2026–2027

EDUCATION

The University of Texas at Dallas, Naveen Jindal School of Management

Ph.D. in Management Science (Accounting)

Richardson, TX

2021–2026

Boston College, Carroll School of Management

M.S. in Accounting

Chestnut Hill, MA

2020–2021

The Chinese University of Hong Kong

B.B.A. in Professional Accountancy, Global Accounting Stream

Shatin, Hong Kong

2015–2019

RESEARCH INTERESTS

My research examines how information is produced, processed, and used inside and outside firms. I study how organizational design shapes firms' internal information environments and operating decisions, how firms produce and disclose information, and how investors and policymakers process that information when making capital allocation and monetary policy decisions. My work primarily uses archival empirical methods, including machine learning, textual analysis, and generative AI.

RESEARCH PROJECT

“Firm Decentralization and Resource Adjustment”

- Dissertation
- Examines the relationship between firm decentralization and their resource adjustment costs and cost stickiness
- Committee: Suresh Radhakrishnan (co-chair), Gil Sadka (co-chair), Miao Liu, Ram Natarajan, and Federico Siano

“External Information Environment and Firm Boundaries: Evidence from the Banking Industry”

with Miao Liu (Boston College)

- Examines how changes in the external information environment affect banks' organizational boundaries
- Presented at the 2023 American Accounting Association Annual Meeting, Panel on ESG in Banking, and the 2024 Financial Accounting and Reporting Section Midyear Meeting

“Federal Reserve Attention to Firms' Macroeconomic Disclosures: Implications for Monetary Policy”

with Suresh Nallareddy (University of Washington), Gil Sadka (University of Texas at Dallas), and Federico Siano (University of Texas at Dallas)

- Uses textual analysis of corporate disclosures and Federal Reserve filing downloads to examine how policymakers acquire and use firm-level information in monetary policy decisions
- Manuscript in progress
- Targeted for submission to a top-tier accounting journal

“Attention as the Catalyst of Market Efficiency: Evidence from Anomalies”

with Yang Cao (Hong Kong Polytechnic University), Ed deHaan (Stanford University), and Miao Liu (Boston College)

- Uses machine learning to predict investor attention spikes and quantifies the value of attention in mispricing correction
- Analysis substantially complete
- Targeted for submission to a top-tier accounting journal

CONFERENCE PARTICIPATION

*Presenter denoted by **

Financial Accounting and Reporting Section Midyear Meeting *	2024, 2026
American Accounting Association Annual Meeting *	2023, 2024, 2025, 2026
